

At Home Veterinary Care is proud to present

## Kitten Kindergarten

*Socialization to make happier, friendlier, easier to handle cats!*

We are pleased to now offer a brand new training course for our feline friends to become familiar and socialized with new cats, new people, new places and basic medical procedures. Here at ATHVC with our ONE HEALTH philosophy it is important for all of us that your kittens feel secure and happy even in changing circumstances!

Kittens will have open play time with plenty of toys, other kittens their age, one on one with the training staff to walk through handling and socialization techniques as well as plenty of entertainment and stimulation to help a new kitten grow up happy!

This class is available for kittens between 3 and 12 weeks old with updated vaccinations and documentation available.
